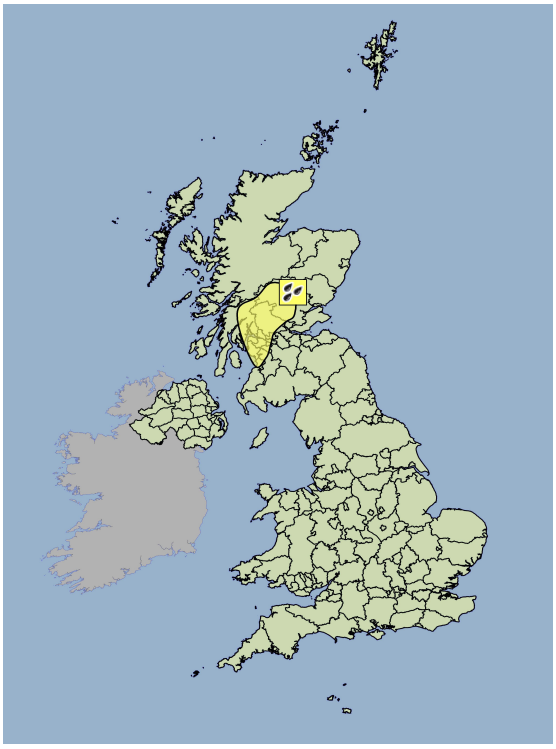
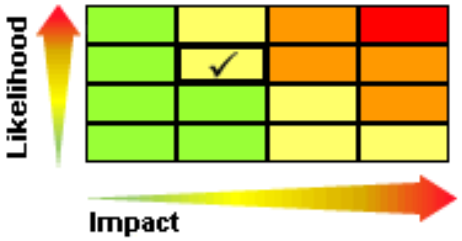
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system is expected to deposit 25 to 30 mm rainfall quite widely within the highlighted area, with 40 to 50 mm possible locally. Since much of this is expected to fall within the next few hours, some localised flooding is possible.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **10:00 on Wed, 17th Apr 2013** until **23:59 on Wed, 17th Apr 2013**

Persistent and occasionally heavy rain will affect the region today, especially up until mid-afternoon, with rain more showery later in day. The public should be aware that localised flooding may develop in prone areas.

This is an update to the warning that was issued on Tuesday, with the area now expanded.
